COLOUR COLLECTION 2.0

What makes things memorable is
that they are meaningful,
significant, colorful.

Joshua Foer

The floor forms the foundation for your personal work and living environment. Colour plays a leading role in this. Colour evokes emotion, creates the right perception and creates a style that suits you.

With the Arturo Colour Collection 2.0 we present the latest trends and colours to you. Of course, we have kept the colours that have stood the test of time over the years.

You can give every interior and every space an atmosphere that feels good. Arturo presents you with a sea of styles, trends and options. The Arturo Style Compass® allows you to easily create your own route towards your favourite floor. Get inspired!

ARTURO STYLE COMPASS

ALWAYS A STYLE THAT SUITS YOU

Choosing a new floor, in the right colour, is not a simple thing. After all, it concerns your personal living or working environment. Arturo advises you carefully when making your choice. We want to create suitable options for each wish and for each style. This is why we closely follow global trends in art, culture, design and interior. We bring them together in the Arturo Style Compass®, presenting you with eight different interior styles. We have translated the various trends for each style into an up-to-date colour palette. This allows you to easily determine your direction and choose the floor that suits you.

 SPORTIVE

Life is too short to be bored! Courage to create spectacular colours is in demand here in order to design a modern space that radiates power and progress. Powerful colours, neon, geometric forms, clear perspectives - as if they had just jumped directly out of the computer. Some rooms simply sparkle with life, without compromise. Rooms that invite you to get active. The focus here is on man.

CONCRETE LOOK

RESIN FLOORS FOR EVERY INTERIOR

Every interior style in the Arturo Style Compass® has a colour palette for resin floors that is composed of four unicolours, two concrete looks and two colours with flakes. The colours are carefully tailored to the different interior styles.

UNICOLOUR FLOORS

Unicolour resin floors are made in a single colour. A good, solid basis for your design. The quiet and light shades form an ideal base to let the rest of your interior shine. Opting for a bolder colour? Then the floor becomes the focal point of the interior. Arturo gives you ideas and creativity free rein!

The overview of all the unicolours can be found on pages 34 and 35.

CONCRETE LOOK FLOORS

Concrete looks are created by mixing two colours during the installation of the resin floor. As a result, the floor has a multi-coloured effect like concrete. The final look of the floor is determined during the installation of the floor. We therefore advise you to be present during this. This allows you to tailor and fine-tune the floor to your taste on the spot.

See the overview of concrete look floors on pages 40 and 41.

FLAKES

Resin floors sprinkled with small Arturo flakes create a decorative effect. Some flakes contain silver and gold coloured particles. This give the floor a unique shimmer in the light.

The overview of flakes floors is on page 36.

POLYURETHANE RESIN FLOORS AND THEIR USE

High demands are made on floors. By the user or by rules and regulations. There are specific requirements for each floor and its function and load. Arturo knows these requirements like no other and complies with them carefully.

The colours in the Arturo Colour Collection® are available in two types of polyurethane self smoothing floors.

Arturo PU2030 Self-smoothing floor
Floors for a light load. It is highly elastic, UV-resistant and offers highest walking comfort. Ideal for homes and stores or, for example, restaurants, museums and showrooms.

Arturo PU2060 Self-smoothing floor
For light to medium loads. Ideal as a finish for floors in schools, laboratories, hospitals, print shops, canteens, technical rooms, etc.

CHARACTERISTICS

Practical & long-lasting Floors based on a polyurethane resin combine an attractive design with functionality: they are seamless and impervious to fluids thus, therefore, very easy to maintain. Being low-emission and AgBB-compliant they also fulfil the highest quality and health requirements.

Also suitable for renovations Because of their thinness (2 – 3 mm), Arturo floors are often used in renovation projects. Depending on the substrate, it is possible to apply to existing floors.

Finishing Both types of floors can be finished with various top coatings. You can read more about this on page 43.

EXPERT ADVICE

Do you need a floor other than a polyurethane self smoothing resin floor? Or do you have any other questions? Arturo offers you a choice from a wide range of resin screeds, pebble floors, coatings and epoxy resin floors. Our floor specialists are happy to provide expert advice on the most suitable flooring system for each specific situation.

OVERVIEW OF ARTURO UNICOLOURS

* The colour Pure White is available only for Arturo PU2030 Self-smoothing floor.

OVERVIEW OF ARTURO UNICOLOURS

OVERVIEW OF ARTURO FLAKES

* The colours Peaceful Crisp and Open Spirit are available only for Arturo PU2030 Self-smoothing floor.

EASY SAMPLING

We have done our utmost to present the colour of our flooring as accurately as possible in this brochure. Sometimes, however slight deviations are possible. To be certain that you have chosen the right colour, it is best to see a colour sample.

ORDER A SAMPLE FROM
ARTUROCOLLECTION.COM

EVERY LAYER MAKES YOUR RESIN FLOOR UNIQUE

Primer / scratch coat Self-smoothing floor Top coating

Almost no floor finishing is as adaptable to individual requirements as a resin floor. Arturo floors are applied in several layers. First, the primer/scratch coat ensures a good connection with the substrate. Then the self-smoothing floor ensures the desired floor properties. Finally, the top coat provides the desired appearance and protects the floor.

HOW IS A RESIN FLOOR INSTALLED?

Grinding of the substrate and subsequent vacuuming

Primer is applied

Application of the scratch coat

Mixing the self-smoothing floor components

The self-smoothing floor is applied with a trowel

Flakes can be scattered

Applying the first sealing coat with a nylon roller

In the last step the second sealing coat is applied

ARTURO STUDIO

SPACE FOR PERSONAL IDEAS

Arturo floors are floors that affect you. This is because of the quality, the different interior styles and the many options. Arturo Studio gives you every opportunity to translate your individual needs into your own unique flooring concept.

Arturo Studio looks, creates and then shows you the space in 2D or 3D perspective. You can almost experience the interior in real life. This allows you to decide in advance whether your floor design will suit the desired layout. Together with Arturo Studio you can create your own floor design. Designs with graphics in Arturo Decofoil are also possible. Use the colours of the Arturo Colour Collection 2.0 as your source of inspiration.

3D-visualisation of Arturo Studio

EVEN MORE COLOUR OPTIONS

Arturo stands for continuous innovation and the Arturo laboratory works daily on the development of products and systems. In addition to the colours from the Arturo Colour Collection 2.0, resin floors are available in almost all RAL and NCS colours. In one colour, concrete looks or decoratively sprinkled with Arturo Flakes.

ARTURO IS ENGAGED WITH ITS PRODUCTS

Arturo Unique Flooring is produced in the Netherlands and is a brand of Uzin Utz Group. Arturo has over 40 years' experience as a leading manufacturer of resin floors, floor coatings and other synthetic resin floors.

Uzin Utz Group supplies the brands Uzin, Pallmann, Wolff, Arturo and codex which provide everything for installing, maintaining and renovating all types of floors. Over 100 years ago Uzin Utz Group started the production of adhesives and quickly grew into part of an international organisation. Arturo stands for continuous innovation and the Arturo laboratory is working daily on the development of products and systems.

Innovative production methods, expert technical advice and a team of enthusiastic employees lay the foundation for perfect flooring.

OVERVIEW OF ARTURO CONCRETE LOOK

OVERVIEW OF ARTURO CONCRETE LOOK

HOLISTIC AND RESPONSIBLE APPROACH

At Arturo our aim is to live and work in such a way that everything we create is sustainable and will be there for future generations. That's why we take a holistic, long-term and environmental approach.

This philosophy influences not only our products and production processes but also manifests itself in our company headquarters, which is one of the most sustainable buildings in the Netherlands.

Ecological and sustainable

Arturo floors meet the needs for sustainable buildings for LEED, BREEAM and DGNB certification. All products are solvent-free, low in emissions and manufactured in accordance with ISO 9001 and ISO 14001.

Regular internal and external quality checks as well as compliance with statutory regulations such as those of the AgBB (German Committee for Health-Related Evaluation of Building Products) are a priority for us. Using Environmental Product Declarations (EPDs) we provide comprehensive information about the environmental effects of Arturo products during their whole life cycle.

Green roof

The roof is covered with vegetation, with the plants providing insulation against heat, cold and noise.

The plants bind CO2 and fine dust particles from the air. Rainwater is collected and utilized for flushing the toilets.

CO₂-neutral production

The heating of the buildings and the heat required in production areas is generated by a combination of pellet heating and geothermal heat using a heat pump. As soon as additional heating is required, this is generated from the biomass fuelled pellet heating. The overall operation of the buildings and production is CO2 neutral.

Intelligent building

The air, light and temperature are sensor-controlled, meaning the work conditions are always ideal.

The taps, showers and toilets are designed so that water consumption is minimal.

TOP FINISHING

The top coating on the resin floor has an important influence on the appearance of the floor. Arturo offers several options to finish the floor: Extra matt, satin or gloss. A slip-resistant surface is also possible.

CLEANING AND MAINTENANCE

Arturo floors are durable and hard-wearing. Proper and regular maintenance ensure a lasting beautiful and high-quality floor that you can enjoy for a very long time. Arturo floors are seamless and impermeable, which make them easy to clean. You can ask a cleaning company for good advice.

Our current cleaning recommendations can be found at www.arturoflooring.com.
